Vigie-PME

Vigie-PME is specialized in the current awareness on the different fields in the areas of entrepreneurship and SME (small and medium-sized enterprises). Affiliated to the INRPME (Research Institute for SMEs) at the Université du Québec à Trois-Rivières, its mission consists in awaring, in collecting and in delivering last scientific publications related to those fields.

More than hundred of scientific journals and conference proceedings are collected and listed based on a series of search expressions defined by experts in the fields. Thanks to the technology of RSS (Really Simple Syndication), the new publications are detected and collected automatically by the Vigie-PME. Titles and abstracts of latest publications are always available to researchers as well as SME's entrepreneurs.

Among these publications, there are also the best papers selected from the research thesis of MBA and master students at the UQTR with the supervision of their advisors.

For the time being, only the publications related to Sustainable development are available.

For further information, please contact:

François Labelle , Ph.D., MBA, General director

Thang Le Dinh , Ph.D., PMP, Technical director
